## 1. Course Evaluation

## Comments Report

## 1. Course Evaluation

1.15) What did you especially like about the course?

- After trying all of them this is by far the best exercise course for BE 1, instructor focused on questions from the audience and explained difficult content in simple and understandable way.
- Clearly the best Exercise Session. In such a difficult course it is fundamental.
- Francesco Conteduca is a very good tutor!  
The solutions to the problem sets were also very helpful and well explained.
- Francesco did a great job, especially considering that the exercises were very long
- Francesco had a lot of patience and explained the concepts in detail
- Francesco is a very approachable and sympathetic tutor.
- Francesco showed great effort to make the course understand the topics.
- Francesco was a great tutor - always helpful and tried to make everything understandable. He always had an open ear and we could always approach him with no matter what type of question. It was definitely by far the best exercise lesson in BE, always fun and just because of him, I really understood the concepts used in BE.
- Great lecturer, comprehensive & funny at times!
- He teaches good.
- I liked that the tutor took enough time to make sure that the students understand the topic and that he gave lots of opportunities to ask questions. His answers were always very helpful.
- I liked the way this tutor explained everything the most (I tried all of the tutors).
- Mr Conteduca really tried to help us understand the course but sometimes the time wasn't enough
- Mr. Conteduca was able to explain very well and had founded knowledge he shared with the students. Also, he loosened the course up with his jokes.
- Mr. Conteduca was always very well prepared for the exercise session and explained the topics very well. He was very concerned that each student understood and was very patient.
- Only useful tutorial.
- Paolo did a really good job. He was very motivating and it was fun listening to him! Thanks a lot for the great tutoring:)
- Questions were always answered and taken seriously.
- Questions were always answered. Instructor really takes care that the students understand the topic.
- Step by step solving of the problem sets
- The clear way of explaining of the instructor.
- The course material provided was overall very helpful. Furthermore the attitude of the instructor was also very friendly. Classes were always enjoyable.
- The lecturer actually explained the reasons why the solution was done this way and not another way. He really answered questions and listened what the actual problem of the student asking was.
- The teacher.. super good at explaining, clarified all doubts, made it fun!
- The tutor made a lot of effort to help us understand the topic, his explanations were clear and really helpful for understanding. I really appreciated the exercises from this tutor.
- The way the lecturer explained the exercises really helped with understanding the concepts introduced in the lecture.
- Tutor was very motivated. He took time to explain everything in great detail. He was very friendly.  
Long solutions + explanations handed out to the students in ILIAS.
- brief introduction at the beginning of each exercise about the current topic and key principles  
instructor cared very much about whether students understood the topics  
instructor's sense of humor  
appropriate speed

- competent, friendly and professional tutor explained everything very thoroughly and clearly, without letting room for doubts and questions
- lecturer explained very well (not just solution, but detailed and comprehensive explanation) and gave opportunity to clarify questions --> best exercise of all core courses this semester
- well structured, very good explanations

1.16) What could/should be improved?

- Availability of one more preparation session for the exam.
- Content is quite tough & time consuming
- Could you please not answer emails from students but ask them to post it on ILIAS and answer it there so each student can read it?
- Explanations could involve instructions how to solve questions, and leave out background knowledge that is not necessary to know for this class
- He should have more classes, not only the two on Friday.
- L15 raum lighting conditions.
- Nevertheless, there was sometimes confusion from his part and he just suggested to write him an e-mail if we dont understand even though it was clear that the whole class was not getting it. Also, a lot of the times hus time management was poor because we didnt have time to solve some exercises
- Often part of excercises could not be solved in class due to time issues, of course this is mainly due to the lecturer going in detail when answering students questions, which is good. However, sometimes I think redundant questions could have been skipped and more difficult excercises should be dealt with first.
- Often we didn't get through all the questions
- Sometimes we ran out of time for the last questions from the problem set as we spent too much time on the first questions. Maybe a quick question at the beginning of the session would be helpful to evaluate on which questions the students would like to pay the most attention to.
- The content of the problem sets is simply too much to be discussed within 1 1/2 hours. We almost never got to discuss the last question of the problem set and almost always had to work the problem sets through by our own again in consequence (after the tutorial sessions, when the solutions were published)
- The course was very slow
- The room in which the exercise took place was not well ventilated and a bit too small for the amount of people attending this exercise sessions.
- The room was a little small for that many students
- There were too many exercises for each session, such that the tutor sometimes could not finish the exercise sheets.
- Usually there was not enough time to cover all tasks.
- When discussing the exercises maybe concentrate on the difficult ones. Very often we spent too much time in discussing every single step of the first (and easy) exercises of the problem sheets, and didn't have enough time to talk about the more difficult tasks
- bigger and more ventilated room
- sometimes hard to understand english
- speech speed sometimes too fast -->hard to follow
- time management, sometimes too much time for the first and easy questions and no time for the more difficult questions in the end.
